

# THE REAL-TIME, MOBILE, WIRELESS WORKPLACE STARTS WITH SCANONLINE

**Enterprise Networks. IoT-Ready Handheld Devices. Workforce Software. Managed Services. Professional Services.**

For a workforce to be proficient, efficient and productive in an array of job tasks, this critical tech ecosystem is a must. Employees that work on-the-go and are fixed to one location need the same technological backbone to work together; however, without the professional and managed services savvy behind it all, it is merely a start.

## ScanOnline is the all-in-one

enterprise network, enterprise mobility and services provider that not only consolidates hardware, software and vendor service offerings, but is the value-added reseller you can rely on for more than any other. We provide the foundations that keep every employee, every operation, and all data connected.

### Enterprise Networks

Connect your people, devices, machines, information and analytics together, with unrelenting speed. Our network infrastructure features include security solutions and centralized management platforms.

### Enterprise Mobility

Grow the abilities of workforces to operate tasks on-the-go, and improve how they communicate and collaborate. Implement management platforms for complete visibility of devices and business in motion.

### Professional Services

Ensure your critical investments are running at optimized speeds and feeds, outperforming expectations. Install and config the right way, from the start.

### Managed Services

Eliminate network and mobile device downtimes, vulnerabilities and frustrations with The ScanOnline Managed Services Group. Monitor, maintain and manage tech with our IT partnership.
