

ScanOnline As-A-Service

One Solution, One Provider

When it comes to rugged mobile devices, wireless networks, label printing and workforce software, they just need to work. Operating, managing & monitoring these critical tools of the trade in modern times require a provider that is as devoted to their lifecycle as they are supplying them.

ScanOnline's One Solution offering is an "as-a-service" model, with a comprehensive focus on the vitality of hardware and software solutions, with multiple funding options available. Our professional and managed services within this approach are all-inclusive; from consultation, strategy, procurement and deployment - to proactive and reactive support long thereafter, you get it all under one contracted rate, without any unknown future costs.
